  - ii.
  - iii.
  - iv.
  - v.
  - vi.
  
2. You plant two apple trees in your backyard. They get the same amount of rain and sunlight. You give special fertilizer to only one of the apple trees to see if it helps it grow faster.
  - What is the independent variable?
  
  - What is the dependent variable?
  
  - What are two controls in this experiment?
  
  - Write a hypothesis for this experiment

3. Identify the following as true or false.

\_\_\_\_\_ You may eat and drink during a lab as long as you keep the food clean.

\_\_\_\_\_ Goggles must be kept in place until *everybody* has finished the lab.

\_\_\_\_\_ The teacher appreciates your imaginative additions to the lab; feel free to improvise.

\_\_\_\_\_ If a chemical gets in your eye, you must rinse your eye under the *faucet in the sink*.

\_\_\_\_\_ Most people will not be calm enough to remember to stop, drop and roll if their clothing is on fire.

\_\_\_\_\_ Always cut toward *yourself* when using a knife or razor blade.

\_\_\_\_\_ Your hands *cannot* be wet if you are handling electrical cords.

4. Match the WHMIS symbol to the description.

- \_\_\_ Gas under pressure
- \_\_\_ Fire hazard that may burst into flames in air or water
- \_\_\_ React chemically to oxidize combustible materials
- \_\_\_ If inhaled, contacts the skin, or swallowed may be fatal, toxic or harmful
- \_\_\_ May cause or suspected to cause serious health effects after acute or repeated exposure to the substance
- \_\_\_ May cause acute toxicity, skin corrosion, serious eye damage/irritations, respiratory or skin sensitization, or target specific organ toxicity
- \_\_\_ For corrosive damage to metals, eyes, skin
- \_\_\_ For explosive or reactive hazards
- \_\_\_ For organisms or toxins that can cause disease in people or animals.
- \_\_\_ May cause damage to the aquatic environment.
